BUILDER MEMBER SPOTLIGHT

Founded in 1992, CORNERSTONE Contracting's mission is to build extraordinary custom homes. Our team is dedicated to consistently exceeding each client's demanding expectations with incomparably high standards supported by our unique client-focused, on-site management approach. It's what separates CORNERSTONE from other contractors.

CORNERSTONE is proud to celebrate its 25th Anniversary and the outstanding portfolio of work it has achieved. With over ninety custom projects completed, our exceptional talent and diversity has earned us projects for New York City Apartments, Family Compounds, Poolhouses, Barns and Recreational Buildings. We have been featured in Architectural Digest, luxe interiors and design, Period Homes, Beautiful Homes and Greenwich Magazine among many other publications.

CORNERSTONE Contracting is a dynamic construction company, enthusiastic about our projects, selective about those we undertake, creative in finding solutions, and committed to providing the personnel, service, and technology to ensure success. We value our teamwork with Clients, Architects, Interior Designers, Engineers, and various Consultants and recognize their importance in the construction process.

CORNERSTONE's work continues to be defined by superior craftsmanship, attention to detail, technical ability, outstanding project management, organization, and coordination, and excellent value. Our process ensures that we consistently deliver

George Pusser

an exceptional home at an acceptable price. Our Projects, often complex and challenging, attest to this expertise.

Our Clients entrust CORNERSTONE with their important construction projects and are enthusiastic about the results. We have a long term commitment with many of our clients beyond their original project and continue to provide services to them, and often times their children, on multiple projects over the years.

Our Team of Project Managers and Construction Managers (many of whom are Master Carpenters and Cabinetmakers) are highly talented and experienced. Most of them have worked with us for fifteen or more years and have completed multiple projects. By employing our own crews, CORNERSTONE is best able to control quality, budget, and schedule. Our team works with a firm determination and is willing to go to any length to bring the project to completion. CORNERSTONE builds teams who build homes, and we can build your dream home too.
